About Us >>>

JibInfo System Inc. is a prestigious and reliable software development service provider, located in the beautiful city of Vancouver, British Columbia. We specialize in helping Small and Middle Size Businesses (SMBs) establish a consistently greater degree of quality, economy, and efficiency in their internal operational system.

As a cost-effective solution, software development outsourcing has been in an international context for the widespread adoption of a variety of enterprises. JibInfo's experts have accumulated a widely recognized knowledge and experience during many years outsourcing services. The use of these attributes in the latest knowledge and experience will help your business grow rapidly, as well as reducing your IT investment in regards to finance and time. JibInfo appeals to a wide variety of venues and attracts a broad range in our client interest, showing that our adaptability to projects is of high caliber.

After many years of service experience for SMBs, we know how to accurately and efficiently solve the problem from the customer's point of view. The first thing we consider is how to help customers to solve problems, the quickest to benefit from the solution; how to implement the project in phases if it is a long-term project, help customers to maximize the return on investment. Our experts are not only proficient in Java, . Net, Web, B / S, C / S and other established technologies, but also are excellent service providers.

Our success has proven that we stand for superior development and diligent customer service. Our highly professional statures are maintained inside and outside of the work environment. You can clearly see the results of our efforts and our company's impact and influence in the financial, securities, manufacturing, medicine, government and professional services industries. We are also very pleased to see that due to our efforts, integrity and professional service, the customer's daily operation becomes more efficient. Because of our mass appeal and caring approach, our satisfied customers eventually become our partners and friends.

Our Mission >>>

We are genuinely committed to the establishment of the SMB for high-quality, high-economy, and high-efficiency of the IT consulting industry standards. JibInfo witnessed too many SMBs that were unable to lead normal operation because of the bad IT system implementation and software development, causing a substantial revenue reduction and staff turnover. More SMBs lost precious money and time due to the failure implementation.

We hope to avoid these unnecessary problems and provide better long-term solution through our unremitting efforts to provide professional services for SMBs; allowing you and your team the ability to bring valuable resources into the primary business activities.

With our sincere interest in your well-being, JibInfo goes the extra mile to assure your satisfaction and ultimate safety.

On this basis, we identified our brand: **"responsibility, trust and value."**

Our contributions to the community >>>

Making contributions to the community is one of the primary reasons behind funding JibInfo. As an emerging high-tech enterprise, we require a lot of resources, but we realize that there are many people in this world who need more help. This acknowledgment led us to positively plunge into the various charitable and environmental protection activities. The authenticity behind our generosity makes our company pleased to know we are doing our part. Aware and appreciative of our accomplishments, JibInfo would like to pass on our support to those in need.

▶ Philanthropy

JibInfo works with International organizations such as American Society for Quality (ASQ) and Project Management Institute (PMI) to provide free professional services to these charitable or non-profit organizations.

JibInfo headquarter and branch offices are working with the local charitable and non-profit organizations in hopes to establish long-term donor programs, in order to contribute to local charities.

Our company and employees are also actively involved in the nature disaster or children and women protection donation activities. Our employees reflect the company's desire to make a difference in the world by doing what we can. We are aware, we are engaged, and most importantly we care.

▶ Environmental

Environmental protection is related to the future generations, which is why we actively participate in this cause.

JibInfo's offices and data centers computer equipments have adopted the latest environmentally friendly energy-saving products in order to ensure minimal environmental hazards; taking into consideration our abilities to reverse harsh affects on our surroundings.

To the supplier, the environment protection is one very important supplier selection criteria. To the clients, environmental protection and green energy industry customers can enjoy the reward of an additional discount.

JibInfo is an Encorp Pacific member: all computer hardware products that were sold have charged the environmental fee in order to ensure the future recycling.

Our staff will also be taking an extra step to get involved. Tree planting activities in local communities each year are just another way that JibInfo takes the initiative to reach out to our surroundings.

Our services >>>

Software Development Standard & Methodology >>>

JibInfo is a member of many international standardization organizations, while the majority of the company's employees are certified through a variety of professional organizations. Our practice in the company's operations is generally a widespread adoption of internationally recognized (example: 6 σ ? CMMI, etc.) or software vendor recommended (such as Microsoft Sure Step, etc.) standards, which are properly tailored based on the actual implementation of each project environment, project situation and customer requirements to develop high efficiency, high–quality, and in line with the client's best interests.

Project Management

PMI PROJECT MANAGEMENT INSTITUTE
Making project management indispensable for business results.®

PMP

JibInfo is the Project Management Institute (PMI) member and the company's excelling project managers are certified Project Management Professional (PMP). This greatly reduces the project failure risk, and effectively improves the project operational efficiency.
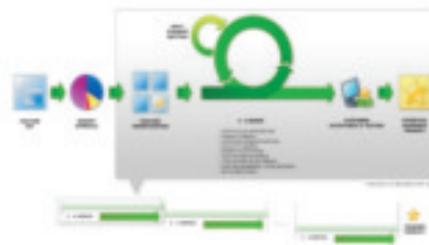

Quality and process management to improve

Q ASQ

JibInfo is the American Society for Quality (ASQ) member and has been certified Six Sigma (6σ) Black Belts and Green Belts experts. During the project implementation, we provide the 6 Sigma process and management improvement service to the customers who require this expertise.

Development Process Management

JibInfo's hardware, software systems and experts can support the widely adopted CMMI, RUP, Agile development and other development process management. We take into account the scale of the project, resource allocation, customer demand and other factors to determine the most suitable development process management approach for each project. This ensures that customers derive maximum benefits from different software development models. (Our Nanjing R & D center CMMI3 certification is in progressing).

CMMI LEVEL 3

Our Partners >>>

In order to provide our customers with comprehensive, high-quality services, we are a global scale with the industry's leading providers of established close partnership. (Hardware, software, development, system integration, training and other services)
